PES319:SOFT SKILLS-II

L:1 T:2 P:0 Credits:3

Course Outcomes: Through this course students should be able to

CO1 :: explain the concept, significance, and role of KYC in ensuring credibility and readiness for digital portfolios and placements.

CO2 :: demonstrate correct pronunciation, syllable stress, and intonation patterns in spoken communication

CO3 :: apply appropriate scripting, framing, lighting, and background principles to produce a clear and professional video CV.

CO4 :: formulate confident, role-specific interview responses aligned with job descriptions and organizational expectations

CO5 :: apply logical reasoning, relevant examples, and structured arguments while contributing to group discussions

CO6 :: demonstrate ethical conduct, professionalism, and responsibility in simulated workplace and placement scenarios.

Unit I

KYC and Digital Portfolio Design : understanding the importance of KYC, elements of KYC, platform skills, recap of professional grooming, key components of effective portfolio design, tools for portfolio creation (Netlify, Vercel, WordPress, Wix), uploading and verification of portfolio link on the placement portal, CV mapping with KYC, specialized CV customization, and approval on the placement portal

Unit II

Effective Vocal Communication : introduction to essential vocal elements, including pace, pause, voice, tone, volume, and stress; identification and correction of commonly mispronounced words; understanding and applying intonation patterns; application of vocal techniques; correct pronunciation through exercises; and communication practice through AI tools (Microsoft Presenter Coach).

Unit III

Video CV : importance of video CV, elements of video CV, tips to write an effective video CV script, technical setup and virtual elements, delivery and body language, editing, feedback, and final review as per current video CV assignments in placements, sharing, tracking, and continuous improvement with AI tools (Hirevue, Vmock, Reziai)

Unit IV

Interview Skills : interview practice through competency-based interviews, situation-based interviews, and sales-based interviews (rebuttal technique, FAB, need analysis), mapping STAR and CAR methodology while answering, essentials of virtual interviews, do's and don'ts of virtual interviews, and immersive training via AI-driven interview simulators (Google Interview Warmup, metaverse)

Unit V

Guided Group Interaction : brainstorming on group discussion topics using AI-powered ideation tools—KWA (ChatGPT, Copilot, Canva AI), SPELT (Gemini, ChatGPT), POPBEANS (ChatGPT, Notion AI), SCAMPER (Miro AI, FigJam), and VAP (ChatGPT, Perplexity). mock group discussion simulation on current affairs, social issues, abstract and domain-specific technical topics, avoiding common pitfalls in group discussion, and virtual group discussion do’s and don’ts. (hands-on training using AI tools Talview, Otter.ai, and Fireflies)

Unit VI

Workplace Ethics : importance of workplace ethics, professional values (integrity, accountability, and respect), professional behavior in the selection process, importance of email etiquette, meeting etiquette, efficient time management and decision-making skills, and handling feedback (AI tools, virtual speech, and Yoodli).

Course Outcomes: Through this course students should be able to

CO1 ::

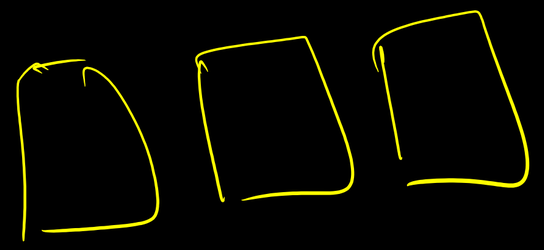
Counting Principles –
There are two basic counting principles, sum rule and product rule.

Sum Rule – If a task can be done in one of n_1 ways or one of n_2 ways, where none of the set of n_1 ways is the same as any of the set of n_2 ways, then there are n_1+n_2 ways to do the task.

Example: No. of ways to order a dish from 5 veg dishes and 6 non-veg dishes is (5+6) ways = 11 ways

.

Example – In how many ways can a person choose a project from three lists of projects of sizes 10, 15, and 19 respectively?



$10 + 15 + 19 = 44$

Product Rule – If a task can be broken down into a sequence of k subtasks, where each subtask can be performed in $n_1, n_2, \ldots, n_k$ respectively, then the total number of ways the task can be performed is $n_1 . n_2 \ldots n_k$.

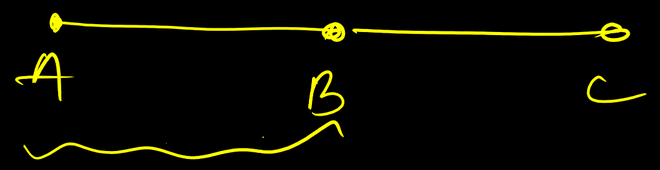
food	Drinks	Desert
15	10	5

$15 \times 10 \times 5 = 750$

Example – In how many ways can 3 winning prizes be given to the top 3 players in a game played by 12 players?

$$^{12}P_3 = \frac{12!}{9!} = 12 \times 11 \times 10$$

Problem 1 : There are three stations, A. B and C. Five routes for going from station A to station B and four routes for going from station B to station C. Find the number of different ways through which a person can go from A to C via B.



$5 \times 4 = 20$

Problem 2: A hall has 12 gates. In how many ways, can a man enter the hall through one gate and come out through a different gate.

12 Enter 11 Exit

$12 \times 11 = 132$
